

LAKE SHORE GOLD

a subsidiary of

PAN AMERICAN
— SILVER —

About Us

Lake Shore Gold is located in Timmins, Ontario, a vibrant community of 45,000 residents that is a central hub for Northeastern Ontario. In Timmins, people can enjoy recreational activities such as camping, world class fishing, nature, and snowmobile trails. Direct flights to Toronto are available at the local airport via multiple carriers. There are many support networks in the community including the local Timmins and District Hospital, local sports leagues for children and adults (hockey, baseball, basketball, etc.), golf courses, both cross country and downhill ski resorts, a community pool, and many other community events that provide entertainment throughout the year (fairs, carnivals, concerts, etc.).

The Bell Creek Complex, located approximately 20 kilometers northeast of Timmins, Ontario, consists of an underground mine and processing facility. Mineralization is associated with the Porcupine-Destor fault system within the Abitibi greenstone belt, with ore mined by narrow vein longhole stoping methods. Ore is then transported to surface via a newly commissioned one thousand eighty metre deep shaft at a mining rate of twenty five hundred tonnes per day.

The Timmins West mine is located approximately 18 kilometres west of Timmins, Ontario, one of the world's most prolific gold camps. Mineralization is associated with the Porcupine-Destor fault system within the Abitibi greenstone belt. The Timmins West mine is comprised of the Timmins deposit, the Thunder Creek deposit, and the 144 Gap deposit. All three deposits are interconnected by underground drifts.

We are currently recruiting for: **Occupational Health Nurse**
